

Glass Roofs are great for shaded decks that get little sunlight. The standard is 5mm clear tempered safety glass but many options and colours are available. Supported by 2½" or 4" thermally broken T-bars.

Gutters are available in different designs from plain to elegant and all are easy to clean out.

You never have to paint a Sheppard's patio cover, it is designed to last and will not rust or rot like steel and wood.

Impact-resistant acrylic skylights in white, bronze and clear with a 10-year discolouration warranty.

Engineered to local building codes.

Our standards and quality are high, which makes us the best in the industry.

*A Sheppard's Dealer will get you covered.*

*Stay cool on a hot summer day and dry on a rainy weekend. Enjoy your deck year 'round under a Sheppard's Patio Cover.*

The Sheppards w pan is the most popular cover we have. Proven for over 40 years to withstand heavy snowfalls and gusty winds. Rollformed .032" aluminum pans in 2½" or 4" depth and 12" wide. Skylights can be added to let more light into your home.

One of our most beautiful covers is the Acrylic Roof. It filters the light and UV rays, letting in lots of light on shady decks and patios. T-bars are spaced approximately on two foot centres and are available in clear, bronze and white.

The Flat Roof is designed for sunrooms and patio rooms. The look is flat and sleek, a very different look than the w pan canopy. Insulating high density foam in 2½" or 4" thick with stucco embossed aluminum laminated on each side. The rigid panels are 27" or 36" wide and coupled with thermally broken H-bars or full length skylights.
